Gaspard Nordin

French engineering Student

gaspardnordin@gmail.com | +33 7 83 71 25 65 | Paris, France | LinkedIn: Gaspard Nordin

Profile

Engineering student (generalist track) currently enrolled in the Programme Grande École at Arts et Métiers (ENSAM). Strong analytical mindset and hands-on experience on large construction sites, combined with solid programming and simulation skills (Python, AnyLogic) for academic projects.

Education

Arts et Métiers Institute of Technology (ENSAM), Metz *Since Sep 2024*
Generalist Engineering Degree — Programme Grande École

- Mechanical, industrial and electrical courses
- Exchange semester at Universiti teknologi of Petronas (Malaysia, mar-aug 2026)

Lycée Lakanal, Sceaux *2021 – 2024*
Classes Préparatoires aux Grandes Écoles (CPGE), Mathematics-physics track
Intensive preparatory course for French Grande Ecoles' entrance examination

Lycée Pascal, Paris *Jun 2021*
Scientific Baccalauréat (Honours: Très Bien)
Advanced Mathematics option

Professional Experience

Construction Site Worker Intern — Formwork (Ouvrier Coffreur) *Jun 2025 – Jul 2025*
Chantiers Modernes Construction (VINCI), Paris

- On-site immersion on a major infrastructure project (interfaces EOLE / Line 15).
- Contributed to the full cycle: prepare–formwork–pour–strip for reinforced concrete structures: fiber-reinforced slabs (voussoirs), walls, and columns; preparation of foundation raft in shaft.
- Read technical drawings, performed measurements with surveyor support, and conducted visual quality checks.
- Coordinated with waterproofing and rebar teams to ensure sequencing and site readiness.

Private Tutor (Remote) *Since Oct 2024*
Tutoring London

- Prepared high-school students for scientific baccalauréat exams (maths/physics).

Academic Projects

Inclusive Task Allocation (Research-supervised project) *Since Sep 2025*
ENSAM Metz

- Developed a task allocation model integrating operators' varying functional capabilities in a production system.
- Applied graph theory and stochastic modelling (Markov chains, Petri nets) to improve planning robustness.
- Built a multi-agent simulation (AnyLogic) to assess productivity and operational fairness impacts.

Entrepreneurship Project (with Medusa - French electric motorcycle start-up) *Oct 2024 – Jun 2025*
ENSAM Metz

- Designed an innovation concept for the electric motorcycle market.
- Used entrepreneurship methods: brainstorming, market study, cross-analysis and synthesis.

TIPE: Queueing Systems Optimisation *Sep 2023 – Jun 2024*
Lycée Lakanal

- Studied queue structures to optimise space, staffing, and waiting time in server–client systems.
- Worked with continuous-time Markov processes and implemented numerical simulations in Python.

Technical Skills

- **Programming:** Python
- **Tools:** Microsoft Office (advanced), LaTeX
- **Simulation:** AnyLogic (multi-agent simulation)

Languages

- English: C1
- Spanish: B1
- Chinese: Beginner

Strengths

- Dynamic and proactive
- Team-oriented
- Strong adaptability and analytical skills

Interests

- Competitive tennis (ranked 15/1)
- Scuba diving (PADI certified)
- Competitive football (5 years)
- Reading (philosophy, current affairs)
